trai Railroad of New Jersey and the traffic returns submitted. The street at large was again left without any authoritative statements bearing on the various deals in one direction or another, the rumors regarding which have been such potent influences in the specula-

In the early dealings there were fairly mensational advances in Consolidated Gas and Amalgamated Copper, and in the rail-way list, Chicago and Northwestern shot up a dezen points, or more, in as many minutes. Less striking advances were common throughout the rallway list, but by mid-day they were either shaded or al-together obliterated. Firm features throughout were Baltimore and Ohio, Deiaware and Hudson, Norfolk and Western, Texas and Pacific, Union Pacific, and the Wabash issues. The Atchison shares and Rock Island were also firm, with some rather hazy reports current linking together the movements in those stocks. The dealings, in fact, throughout the day were attended by an unusual volume of rumors of one kind or another, while the facts in the case were limited to the tightening money market, and the traffic returns reported.

tightening money market, and the traffic returns reported.

The local traction issues were dull and under moderate pressure during the greater part of the day, on expectations that another unfavorable decision would be handed down in a suit brought to test the legality of some of the provisions of the franchise taxing law.

The industrial quarter generally was firmer than the railway list, particularly as regarded the Tobacco stocks, Pressed Steel Car, and Sugar Refining, the list named rising with particular rapidity.

The United States Steel stocks were small very bisavity dealt in, but with comparatively small results, as regarded price movements. American Smelting was heavy on the rumored reduction in the selling prices, for some of its products, although official denials were made of the reports in question.

The break in the stock market expect ed by many yesterday came during the last two hours of the day. Prices were off stendily until the close, which was a the bottom level for the day and from fraction to 7 points or more below the best. The cause for the weakness as fa as the gossip showed was the anxiety over the maney outlook, and some little uncertainty lest the Burilington-Narthern Pacific deal might not materialize. Some careful people believed that the real explanation of the break on Menday and the second break yesterday is to be found in the immense realizing that has been taking place among the insiders during the past week, and the lack of hearty support that has been given the murket by these same interests. These people advise the selling of long stocks on every advance and caution against purchases except of a few securities, and except on breaks. The outlook is, of course, a most uncertain one, because the Morana chique is no ordinary "bob-tail" manipulative elique, and cannot be reckoned with as any ordinary buil clique can, but on the whole the chances seem to favor the theory that the market has reached its cuimbation, for a time at least, in the majority of stocks. us the gossip showed was the anxiet

Money on call yesterday afternoon we loaning at 5% and 6 per cent again an the street was auxious lest a squeez the street was agricus lest a squeeze might develon. According to the financial experts the banks have lost since his Priday nearly \$2.00,000, and it can be seen that the surplus reserve is in danger. There have been rumous during the week that Secretary Gage is considering the purchase of a large block of bonds from New York, but as yet, apparently, he has not servested the terms at which they were offered. He may have refused them.

Two very different stories were circu ed mesterday regarding the Burlingto Northern Pacific-Great Northern deal Calombia 168

Declines in Prices.

Money Market Conditions Served as a Check to Buoyant Speculation—Advances Scored in the Opening Hours—Pavorable Developments.

NEW YORK, April II.—At the opening of business in today's steek market there were some appearances that the turbulent bull speculation of the last two days would be renewed. Further tremendous advances were scored in a number of directions and the dealings were in simply enormous volume.

With the course of the morning how.

The new deal rumor yesterday was to the more steady at the beston.

The new deal rumor yesterday was to the meaning paractically at the beston.

The new deal rumor yesterday was to the new deal rumor yes

ber of directions and the dualings were in simply enormous volume.

With the course of the minring, however, the activity subsided and a number of very pronounced reactions took place. The decline in animation, which was coincident with the reaction in prices, has been a familiar sign of the current stock market for an indefinite period, and is sufficient evidence of the speculative temper of the public. On the face of it the main cause of the check administered to the buoyant speculation was to be found in money market conditions, which continued active and rather close. At the same time these conditions have been definitely foreshadowed through the known movements in the money market for ten days past, and as a rule Wall Street does not await the actual issue of expected circumstances to act on them.

The bulk of the day's borrowing was effected between 5 and 6 per cent. The day's developments were generally favorable, aside from the money market. Comprised among them were Mr. Morgan's arrival in England, the excellent Government crop report, the bettering prospects for an amicable settlement of the threatened labor troubles on the Central Kaircad of New Jersey and the traffic peturns submitted. The street it large was again left without any authoristity statements bearing on the varilarge was again left without any authoristity statements bearing on the varilarge was again left without any authoristity statements bearing on the varilarge was again left without any authorlarge w

The story that the Pennsylvania is buy-ing Rock island and Atchison was also heard in the street yesterday, but it re-ceived little attention. These stocks all advanced in the morning and were off in the afternoon, with the general mar-ket.

The outlook seems better for a settle ment of the trouble of the Jersey Central with its employes without a strike, but there was little to reflect this in the actions of the anthractic securities yesterday afternoon. The group was inactive, in fact, and soid off rather than the other thing, though the movements in either direction were very small. There was not one transaction in Jersey Contral during the day.

after seiling at high as 494, went off 6, and the prefered went off from 264 67. and the prefered went off from 26% to 36%. Mr. Morgan has reached Europe at there was a general feeling in the stree that his arrival might be the signal for a boom in these securities. It was said that he will probably sell big blocks of the stocks in Europe, as well as make at rangements for the completion of a number of other important deals, in which Europe is Europe is Europe in the stocks on this movemen freed not be given up yet, but at the moment, the chances seem to favor at least a period of "rest."

whether Mr. Gates has secured control of the Celerado Fuel and Iron Company or not, the insiders seem to be determined to advance the price of the stock. It was one of the most buoyant on the list resterday, getting as high as 75%, and closing with a good gain at 14%. Mr. Gates and on Wednesday that he was the controlling interest in the company, as was stated in The Times on Thursday morning. Festerday Mr. Osgood, the president of the company, came out with a statement that Mr. Gates was mistaken about heing in control. The stock is a very treacherous one to speculate in under the best of circumstances, and, with Mr. Gates in control, or trying to get control, the situation will not be improved any.

Sugar had another buige yesterday, get-ting at one time to 195%, the best price attained by it for many months. It sold off somewhat later, but closed with an excellent net gain for the day. The talk of a probable boom in the stock continues.

It is said in the street that the Standard Oil people have secured a large interest in the People's Gas Company, and will have a voice in the directory in the future.

There is one theory to account for the sold on private terms. No. 2 red nominally higher at 775c.

There is one theory to account for the tremendous advance in a few securities sold on private terms. No. 2 red nominally higher at 775c.

Western wheat today opened firm; May, lie the past month while the general markets has been on the while the general markets were all lower, plants much and that is not inherently with the past month while the general markets were all lower, plants much and the two or three groups of capitalists all with our three groups of capitalists at which is proposed in the demand for actual wheat. Cash and the control of the control of the past monther. According to this theory these control cach of a trans-continental system. The Vanderality may kings are racing for the control each of a trans-continental system. They are not in harmony and each is, to a certain extent, attempting to the others. Hence the buying of the securities of Burlington and Northern Pacific and Atchison and Book Island and the Goulds in a manner that has been very mystifying from the beginning. Hence too, the neglect of the remainder of the list owing to the fact that the market leaders are so absorbed in their special plants. Something of all this is undoubtedly true, though to what excent it is impossible to fathom. The contests, where there are contests, in the contests of the contests in the contests in the contests, where there are contests, in the contests of the contests of

THE CHICAGO GRAIN MARKET.

Stronger on Damage Reports. CHICAGO, April 11.—Wheat opened a fraction lower on the Government report estimating a 475,000,000-bushel yield of winter wheat. There was a lack of selling pressure. However, the market turned strong, advanced 15c on shorts covering and buying for local and outside accounts, on reports of damage in the Southwest from Hessian by. The advance was checked by liberal commission house selfing. Liverpool was affected by the above report, closing %974d lower. Primary receipts were about the same as last year. Clearances heavy, 800,000 bushels. Duluth and St. Louis reported an improved export demand. There was a good enquiry here, but only 50,000 bushels given out up to the close. Yesterday's sales,

Corn was firm. The feature was the selling of May and buying of July by the leading long interest. May was rather neglected by the general trade, only a few shorts covering. July was lower early on local covering. July was lower early on local professional selling, but rallied on their covering later. There is a good short interest accumulating in this delivery. Country acceptances are very small and that the roads are in bad shape is evidenced by the light primary recepts.

The oats market was strong. The backwardness of seeding operations and the excellent cash demand were the factors. Elevator firms, shippers and shorts bought freely. There was a fair outside trade.

Provisions advanced moderately, in

cather direction were very small. There was not one transaction in Jersey Control during the day.

The steel securities were strong in the morning but weak in the afternoon, under very heavy realizing. The common stock, after seiling at high a "No work" and the steeling at high a "No work" and the steeling at high a "No work of the steeling at high a "No work" and the steeling at high a "No work" and the steeling at high a "No work of the steeling at high a stronger hog market, and because of an improved shipping demand to be a stronger hog market, and because of an improved shipping demand for both meats and lard.
